

# Bachelor of Business Administration (BBA)

## Specialization in Accounting

### OVERVIEW

Accounting is an essential function for all profit and not-for-profit operations. AIU® offers an industry-relevant BBA program with an in-depth specialization in Accounting that focuses on all aspects of financial reporting including business concepts, ethics and regulations. Emphasis is placed on measurement, valuation and presentation of asset-related items in a business environment.

#### CURRICULUM INCLUDES

In this specialized curriculum, students can learn the key components of the accounting system and gain exposure to the sub-fields of economics, cost accounting, taxation, business accounting, and accounting in finance.

This real-world specialization offers the opportunity for in-depth study, with more than half of the courses dedicated to accounting. It can help students develop a focused, industry-specific knowledge base common to accounting professionals in today's business environment.

For example:

**Intermediate Accounting II:** students can learn the fundamentals of management accounting. This course will cover cost accounting, how to develop and use information for costing products and services, decision-making, operational budgeting and performance evaluation. This course also provides an update on recent developments in the field.

**Cost Accounting:** students can conduct an advanced study of the concepts and techniques used by management accountants to assist decision makers within the organization. Areas covered include process accounting, job-order accounting, measuring quality costs, activity-based costing and evaluating performance.

**Accounting Information Systems:** students will focus on the study of concepts and terminology of accounting information systems. Students will explore the use of accounting information systems and how they impact decision-making in accounting and auditing. The course also covers information technology fundamentals, responsibilities and business implications.
