

Bachelor of Business Administration (BBA)

Specialization in **Finance**

OVERVIEW

Today's increasingly complex business climate has created a variety of fields of interest for professionals with knowledge of the world of finance. AIU® offers an industry-relevant BBA program with an in-depth specialization in Finance designed to provide students with knowledge, skills and ability to pursue opportunities in the finance industry. The program culminates in a capstone experience from a financial management perspective. Core competencies in technology, critical thinking and communication are emphasized throughout the curriculum.

CURRICULUM INCLUDES

In this specialized curriculum, students can learn the key components of financial decisionmaking, while examining the implications of forecasting, capital budgeting, working capital management and project risk management. This real-world specialization offers the opportunity for in-depth study, with more than half of the courses dedicated to finance. It can help students develop a focused, industry-specific knowledge base common to financial analysts in today's business environments. For example:

Capital Planning: students will focus on financial-management techniques related to capital expenditure and investment decision-making. Topics include short-term and strategic implications of capital expenditure decisions. Students will explore how to develop an integrated approach to making decisions about capital expenditures as well as their managerial implications.

Investment: students will explore securities and securities markets. Topics include analysis of corporate securities, public securities and other investment types. Students will also study the types of financial risk and taxation that affect investment-policy timing, selection and value.

Financial Analysis: students will examine how to read, interpret and analyze financial statements. Topics will include liquidity and activity, analysis of solvency, analysis of capital structure, profitability, market strength, cash flow, and interim segment analysis.

WE CAN HELP YOU

- Assess decisions and employ methods for improving decision-making
- Apply team building and leadership skills, and communicate effectively in business situations
- Apply mathematical, statistical and research techniques to analyze contemporary business practices and functions
- Apply the concepts and principles of finance and accounting to make effective decisions
- Discuss current operations management practices and principles used in the current business environment
- Explain macroeconomic and microeconomic concepts and how they relate to the management of domestic and global organizations
- Recognize and manage potential ethical and legal conflicts, and discuss the implications of technology and the Internet on today's businesses
